

Missing permissions to submit reviews to gerrit

If you have a problem similar to this

```
[~/example_repo] git review
remote: error: branch refs/publish/master:
remote: You need 'Create' rights to create new references.
remote: User: foo
remote: Contact an administrator to fix the permissions
remote:
remote: Processing changes: refs: 1
remote: Processing changes: refs: 1, done
To ssh://gerrit.example.org:29418/example_repo.git
! [remote rejected] HEAD -> refs/publish/master (prohibited by Gerrit: not permitted: create)
error: failed to push some refs to 'ssh://foo@gerrit.example.org:29418/example_repo.git'
```

Step-by-step guide

1. Check that your version of git-review is ≥ 1.28

```
a. git review --version
git-review version 1.28.0
```

2. If your version of git-review is not 1.28 or greater, upgrade it
3. Try your review again after the upgrade
